COM2000: **THE BEST HD VIDEO SOLUTION**

Now at the lowest price ever. For any size property.

DIRECTV sets the industry standard for equipment features and product reliability with COM2000. This second-generation commercial headend product leverages the reliable and hardened COM1000 platform, which has been the market leader since 2009. Key features for COM2000 include:

- **Energy Efficient:** Requires less than 225 watts of power consumption.

- **50% Cost Reduction from Previous Model:** Scalable, small modular design reduces overall cost per channel by up to 50% for twice the HD channels over existing solution. Integrated EdgeQAMs reduce overall system cost and simplify the installation and maintenance.

- **Reliable and Adaptable:** Highest density headend system that can service any size property or infrastructure.

- **User Friendly:** Configurable on-screen, scrolling program guide.

GUEST ROOMS

COM2000

A compact and energy-efficient video solution for the hospitality free-to-guest market.

- Chassis Dimensions: 3RU (5.25"H x 17"W x 13"D)

- 6 x COM46, COM46-FLX, COM24 or COM24-FLX blade slots.

MORE CHANNELS **IN LESS SPACE**

- 8 HD channels per blade

- 48 HD channels in 3 RUs (5.25″), 96 HD channels in 6 RUs (10.5″)

- Easy-to-expand platform supports hundreds of channels

EASY TO INSTALL, **MANAGE AND OPERATE**

- Developed on same platform as the reliable COM1000

- Plug-and-Play platform

- Improved local management through integrated Web interface

- Remote management for all your properties from one system status/dashboard interface

- Local and over-the-air content insertion

ENVIRONMENTALLY **FRIENDLY**

- Even more efficient design than the eco-friendly COM1000

- FCC tested as Commercial Grade Equipment (designed for harsh environmental conditions) with low energy consumption

GYM

COM2000: **THE MOST COMPACT, ENERGY-EFFICIENT VIDEO SOLUTION**

For the Hospitality Industry

FEATURES	BENEFITS
■ **Scalability**	Convenience of increasing channels as needed by adding Receiver Blades.
■ **Redundancy of critical components**	To maintain the highest level of system availability, critical components are redundant (e.g., system cooling fans).
■ **Remote monitoring and management**	Network is securely monitored remotely over the Internet or local network using a simple Web browser-based management interface.
■ **Platform-based core technology**	The system has the ability to support any number of digital rights management and conditional access schemas.
■ **Multi-network compatible**	Supports both RF and IP networks.
■ **48 HD channels per chassis**	Twice the HD channels at the lowest cost per channel. Two QAM6 slots in the new COM360 chassis support up to 24 channels of QAM.
■ **Auto tracks programming changes**	System intelligence allows for hands-off reconfiguration when programming lineups move or change.
■ **Integrated Web interface** (configuration management and system diagnostic tools)	Simplifies configuration and support, while also allowing for system diagnostics and remote management, decreasing truck rolls and operational support costs.
